

# Inner Liner

## UNICEF standard

### › Key features

- › Inner liner with integrated groundsheet, suspended from tent frame
- › Designed to create a clean, comfortable, stress-free environment, especially focussing on child-friendly spaces, medical treatment and office/accommodation
- › Highly breathable materials with added ventilation grates in gables and along the top of the side walls
- › In front of the Inner liner is a small vestibule to be used as storage, changing area or waiting room
- › The tripple door design allows costum door configurations, with the centre door fitted with an additional mosquito screen door
- › The gables in front and back are fitted with inlet ducts for externally placed heating or air conditioning units. In the top left and right corners are inlets for power cables
- › Rot and mildew proof, easy to clean and disinfect, resistant to commonly used disinfectants and detergents
- › Heavy-duty durable block zipper to assure long useability
- › Environmentally friendly: low energy production process, fully recyclable, safely disposable by burning or burying when recycling is not possible
